Sub: Recognizing the Flower Man of India

Respected Sir,

I feel it is my bounden duty to bring to your notice the great work being done by Dr Ramji and his team of AAPSI in motivating FLORICULTURE in Haryana. Dr Ramji of village Darbi, Distts Sirsa (M)9416241910 belongs to a family of Freedom Fighters who , after independence refused to accept any pension or rewards for their role in the freedom struggle.

His basic idea stemmed from his belief that 'to remove dirt and Kachra from a site, and leave it as such does not work', but if you want the site to remain litter free, **plant flower saplings** and people will not litter the site. Furthermore he observed that "The trees in a flowerbed do not perish and have a very high propensity to survive". Therefore Dr Ramji Jaimal, an Ayurvedic doctor, decided to devote his life to promoting Floriculture through free saplings. He started with 50,000 saplings in 2006 and last year (2021) distributed 100 Crore saplings to over 7000 schools, Police chowkies, Jails, Police stations and to many other public institutions from 738 places in 7 States and 2 UTs of North India including Haryana, Punjab, H.P., J&K, U.P. Uttarakhand, Delhi, Chandigarh, and Rajasthan. A large number of Government Quarters, Govt offices, Cantonments, PWD Rest houses and Irrigation Bungalows borrow his saplings to beautify themselves.

He uses his own land and also that of friends and relatives under the orchards to grow the saplings and then they get volunteers who pluck the

saplings from 2 A.M. and do weighing and packaging of over 56 species of flower saplings for despatch from village Darbi from 8 A.M. till late night. Last year they sent 100 cr saplings creating millions of smiles all over. He has won numerous awards like Sri Maheshwarnath ji award, State Youth Award from NYK and numerous other awards as I could see from over 50 shields at his home for his pioneering work to make Swachh Bharat beautiful as well. A large number of farmers take his free saplings and grow them and sell the plants for a living. A film "BEFORE I DIE" made on his life has won 61 International awards and was selected for 105 international films. The film can be seen on this link. <https://youtu.be/bUutZv-ulc>

Dr Ramji has also helped install over 756 Green crematoriums in Rural areas which lead to saving of 1.5 Tree per cremation. It uses only 60 kg firewood or cowdung sticks per cremation. He has made **India's first Green Crematorium for Pets and Small animals** at Faridabad recently. He is also active on various other social activities.

I strongly recommend that his name be considered for any Awards so that efforts of Dr Ramji are recognized at the earliest.

With regards,

Yours truly,
